

Pig Improver

2018 Nutrition Seminar Presentations

In this issue of the Pig Improver, we share recorded presentations from our recent nutrition seminars that we held in August and October.

During these seminars, our team of nutrition and technical experts visited four locations across the U.S. and Canada and met with hundreds of swine nutritionists to share their research in meat quality, gilt development, sow feeding and more. We concluded each seminar with a workshop focusing on PIC's lysine and energy economic tools. Below are links to three separate presentations from these seminars:

- [Feeding for Maximum Profit](#)
- [Body Condition Management](#)
- [Sow Feeding Update](#)

Enjoy listening!
